ABOUT

Result-oriented and versatile Software and DevOps Engineer with a proven track record of building scalable web applications, designing resilient cloud architectures, and automating delivery pipelines. Passionate about bridging the gap between development and operations to drive release velocity, optimize system performance, and deliver high-impact enterprise solutions. A collaborative problem solver dedicated to continuous improvement and implementing software engineering best practices.

EXPERIENCE

DevOps Engineer

Nov 2025 – Mar 2026

Wiyse

Freelance, Remote

- Delivered features across 5+ production modules using React/Next.js + TypeScript and FastAPI/SQLAlchemy, improving release velocity through close cross-functional collaboration.
- Set up autoscaling microservices with zero-downtime deployments and auto-recovery on AWS EKS using ArgoCD and ECR.

Junior Software Engineer

Aug 2025 – Sep 2025

Goodfit

Freelance, Remote

- Shipped 6 key roadmap features (45% of Q3 scope), raising user engagement 15% by architecting core React/Next.js modules using TypeScript, Tailwind CSS, and PostgreSQL.
- Reduced median page latency 18% and production defects per release 25% via profiling, code refactoring, and structured peer reviews.

Software Development Engineer

May 2025 – Aug 2025

PredictGrowth

Freelance, Remote

- Led 70% of a performance sprint and built a multi-theme PDF export service, increasing customization usage 15% and cutting workflow latency 10%.
- Optimized backend throughput 35% and cut response times 20% by implementing async workers, database query batching, caching, and resilient AWS configurations.

Software Development Engineer

Feb 2024 – May 2025

RevMaxx

Part-time, Hybrid

- Designed core backend services (auth, billing, onboarding) supporting 120% user growth, enterprise onboarding, and 100% protected RBAC endpoints.
- Improved API and streaming performance 30% and reduced server CPU usage 22% via query refactoring, database indexing, and WebSocket batching.

Software Engineer — Multiple Clients & Companies

Jun 2023 – Nov 2024

Avinya NeuroTech, Connect AI, Rad Media Solutions, PepHub

Freelance / Part-time, Remote

- Shipped 20+ full-stack features (dashboards, API gateways, real-time channels) using Angular, React, Node.js, FastAPI.
- Built Docker + Jenkins CI/CD pipelines, cutting deploy time 50% and raising critical service test coverage to 95%.

SKILLS

Programming: JavaScript, TypeScript, Python, Bash/Shell

Frontend: React.js, Next.js, Angular, React Native, SCSS, Tailwind, Figma, Responsive Design

Backend & Databases: Node.js, Express.js, FastAPI, REST, WebSocket, PostgreSQL, MySQL, MongoDB, MariaDB

DevOps & Cloud: Linux, Docker, Kubernetes (EKS), ArgoCD, AWS, GCP, Azure, DigitalOcean, Jenkins, Ansible, Git/GitHub, CI/CD

IoT: Arduino, Raspberry Pi, Node-RED

EDUCATION

B.Tech in Computer Science and Engineering (IoT, Cybersecurity, Blockchain)

Expected 2026

University of Engineering and Management, Kolkata

GPA: 7.44

PROJECTS

TotalScribe: AI-powered medical SOAP note generator using OpenAI Whisper Large and Mistral-7B; built full-stack (Next.js + FastAPI) with SSE real-time updates and secure user session management.

SATYAMEBA — HPC Cluster: Orchestrated the SATYAMEBA high-performance computing cluster at UEM Kolkata, an academic supercomputer supporting AI research and distributed LLM workloads.

TrainTrack API: Lightweight FastAPI service fetching live Indian Railways status from NTES and returning formatted JSON data.
