ABOUT

Recent Computer Science graduate with hands-on experience in production backends, AI workflows, and cloud delivery. Shipped customer-led integrations, scalable services, and zero-downtime Kubernetes releases.

EXPERIENCE

Full Stack Developer May 2026 – Jun 2026
Meow AI, LLC (Ryze AI) Remote

- **Product Growth:** Increased new-user sign-ups 20% by connecting Shopify store data to the platform's AI workflows.
- **Billing Reliability:** Reduced payment and subscription activation errors 18% by diagnosing and rebuilding the Stripe billing integration across checkout, subscription, and webhook flows.
- **Team Access:** Added 2 new authentication capabilities (multi-profile identities and team-based access), expanding the platform from individual accounts to secure organizational use.

DevOps Engineer Nov 2025 – Mar 2026
Wiyse Freelance, Remote

- **Release Reliability:** Achieved zero-downtime releases across 100% of services by containerizing workloads and orchestrating autoscaling deployments on AWS EKS with ArgoCD and ECR.
- **Developer Productivity:** Eliminated manual deployments across 100% of services with CI/CD and pre-deployment test gates, enabling independent releases while blocking failed builds before production.
- **Production Observability:** Added 2 real-time alert categories for services and deployments, shortening failure detection and recovery across Kubernetes workloads.

Software Development Engineer Feb 2024 – May 2025
RevMaxx Part-time, Hybrid

- **Enterprise Impact:** Enabled a $100K enterprise contract by partnering directly with the client's engineering team to integrate RevMaxx into its application through the Enterprise API.
- **Scalable Platform:** Single-handedly built authentication, billing, onboarding, and RBAC services supporting 120% user growth; improved API/streaming performance 30% and cut CPU usage 22% through indexing and batching.
- **AI Workflow Automation:** Automated 3 clinical stages using LangChain, OpenAI Whisper, and RAG: speech transcription, documentation, and medical-code retrieval.

SKILLS

Programming: JavaScript, TypeScript, Python, Bash/Shell
Frontend: React.js, Next.js, Angular, React Native, SCSS, Tailwind, Figma, Responsive Design
Backend & Databases: Node.js, Express.js, FastAPI, REST, WebSocket, PostgreSQL, MySQL, MongoDB, MariaDB
DevOps & Cloud: Linux, Docker, Kubernetes (EKS), ArgoCD, AWS, GCP, Azure, DigitalOcean, Jenkins, Ansible, Git/GitHub, CI/CD
IoT: Arduino, Raspberry Pi, Node-RED

PROJECTS

SATYAMEBA — HPC Cluster Ansible, Kubernetes, Docker

- **Research Enablement:** Built multi-GPU cluster software enabling students and faculty to run compute-intensive AI research.
- **Infra Automation:** Automated provisioning, GPU scheduling, and monitoring with NVIDIA GPU Operator, Prometheus, and Grafana.

TotalScribe Next.js, FastAPI, Whisper

- **Clinical Automation:** Converted encounter audio into SOAP notes with Whisper Large and Mistral-7B, reducing manual documentation work.
- **Real-Time Pipeline:** Built GPU-accelerated processing with SSE progress updates for end-to-end visibility.

Splitty Next.js, PostgreSQL, Drizzle

- **Algorithmic Efficiency:** Reduced settlement from quadratic pairings to linear transfers using a greedy creditor-debtor algorithm.
- **Secure Platform:** Built multi-currency expense sharing with HTTP-only sessions, enabling groups to track, settle, and close expenses.

TrainTrack API Python, FastAPI

- **Structured Rail Data:** Converted unstructured NTES pages into validated JSON events through a single endpoint.
- **Resilient Integration:** Automated CSRF/session bootstrapping, validation, and time filtering for reliable status consumption.

EDUCATION

B.Tech in Computer Science and Engineering (IoT, Cybersecurity, Blockchain) Jul 2026
University of Engineering and Management, Kolkata GPA: 7.45
