EXPERIENCE

DevOps Engineer

Nov 2025 – Mar 2026

Wiyse

Freelance, Remote

- Delivered features across 5+ production modules using React/Next.js + TypeScript and FastAPI/SQLAlchemy, improving release velocity through close cross-functional collaboration.
- Implemented new features and optimizing existing functionalities to enhance user experience and performance.
- Set up autoscaling microservices with zero-downtime deployments and auto-recovery on AWS EKS using ArgoCD and ECR.

Junior Software Engineer

Aug 2025 – Sep 2025

Goodfit

Freelance, Remote

- Delivered 6 roadmap features (45% of Q3 scope), increasing user engagement 15%.
- Architected core React/Next.js modules (theming, data layer, reporting) with TypeScript, Tailwind CSS, PostgreSQL.
- Reduced median page latency 18% and production defects per release 25% via profiling, refactoring, and structured peer reviews.

Software Development Engineer

May 2025 – Aug 2025

PredictGrowth

Freelance, Remote

- Built a multi-theme pitch-deck PDF export service and led 70% of a performance sprint, increasing customization usage 15% and reducing workflow latency 10%.
- Implemented async workers, batched DB access, and LRU caching; cut average response time 20% and boosted throughput 35%.
- Integrated AWS (S3, EC2, CloudWatch) for resilience: 99.9% uptime and handled 3× traffic spikes without incident.

Software Development Engineer

Feb 2024 – May 2025

RevMaxx

Part-time, Hybrid

- Designed backend architecture (auth, billing, onboarding) supporting 120% user growth and onboarding 5 enterprise clients; authored 40% of core services.
- Improved API and streaming performance 30% via indexing, query refactors, and WebSocket batching (–22% server CPU).
- Implemented authentication and RBAC (100% of protected endpoints) and reduced high/critical dependency vulnerabilities 80%.

Software Engineer — Multiple Clients & Companies

Jun 2023 – Nov 2024

Avinya NeuroTech, Connect AI, Rad Media Solutions, PepHub

Freelance / Part-time, Remote

- Shipped 20+ full-stack features (dashboards, API gateways, real-time channels) using Angular, React, Node.js, FastAPI.
- Built Docker + Jenkins CI/CD pipelines, cutting deploy time 50% and raising critical service test coverage to 95%.

SKILLS

Programming: JavaScript, TypeScript, Python, Bash/Shell

Frontend: React.js, Next.js, Angular, React Native, SCSS, Tailwind, Responsive Design, Figma

Backend: Node.js, Express.js, FastAPI, REST, WebSocket

Databases: MySQL, MariaDB, PostgreSQL, MongoDB

DevOps: Linux, Git, GitHub, Docker, Docker Compose, Networking, Jenkins, Kubernetes, ArgoCD, Grafana, Prometheus, Ansible, CI/CD

Cloud: AWS, GCP, Azure, DigitalOcean

IoT: Arduino, Raspberry Pi, Node-RED

EDUCATION

B.Tech in Computer Science and Engineering (IoT, Cybersecurity, Blockchain)

Expected 2026

University of Engineering and Management, Kolkata

GPA: 7.44

PROJECTS

TotalScribe: AI-powered medical SOAP note generation from patient audio using OpenAI Whisper Large for transcription and Mistral-7B Instruct for structured note generation; full-stack app (Next.js + TypeScript frontend, FastAPI backend) with SSE real-time progress and enterprise-grade security.

SATYAMEBA — HPC / Supercomputer Cluster: Experience building the SATYAMEBA high-performance computing cluster at UEM Kolkata — an academic supercomputer supporting AI research and in-house LLMs; involved in cluster setup, orchestration, and performance tuning for distributed AI workloads.

TrainTrack API: A small FastAPI service that fetches the Indian Railways train running status from the National Train Enquiry System (NTES) and converts the returned data into a clean JSON response.
